

Honeywood Museum, London Borough of Sutton

Listed Building Consent for Repair and Restoration of Grade II Listed Building, Consented, November 2018

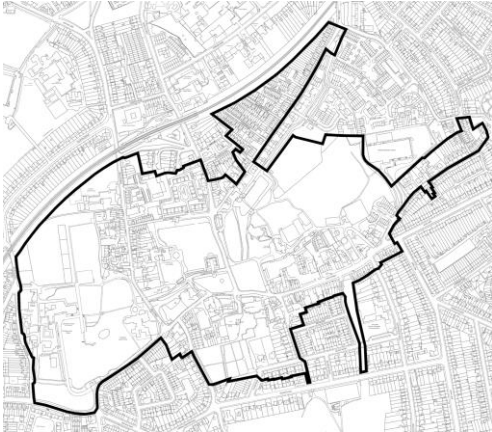

Case

In September 2018, The Heritage Advisory submitted an application for listed building consent for works of extensive repair and restoration to this Grade II listed building located in Carshalton Village Conservation Area.

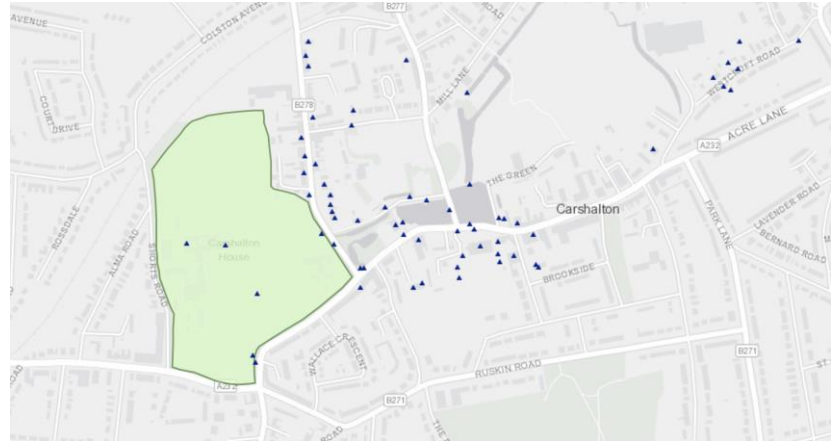

The evolution and consequent significance of the site was complex, involving a late C18 structure built around the core of an earlier structure, prior to further extension over the C19; all of which surmounted a watercourse.

The gradual phasing of the site and complexity of this required deeper consideration than otherwise and a wholly conservation-led approach to both detailed works and those of overriding structural stability etc.

Undertaken in close conjunction with principal contractors Stonewest Ltd. on behalf of the London Borough of Sutton, owners and operators of the Museum, the work focused upon a failing chimney structure and boundary wall.

The Conservation Area

Distribution of Listed Buildings

Outcome

Following the detailed negotiation of materials and consequent conditions, this work was successfully consented in November 2018.

This ensured the stabilised integrity of both the listed building, its special interest, and its continued contribution toward both the character and appearance of the wider conservation area and settings of other listed buildings.
