PLINCKE

30 YEARS OF DESIGN INNOVATION

We are a professional practice of landscape architects and urban designers working nationally and internationally.

Plincke is a company of landscape architects and urban designers with a 30-year track record of award winning, innovative and cost effective design solutions for the built and natural environments.

We work with clients in both the public and private sectors, often as part of multi-disciplinary design teams. Our approach is based upon an open and collaborative way of working, engaging with our clients and stakeholders to achieve optimal results from each project.

Our strategically located design studios enables us to work effectively nationally and increasingly internationally.

MANAGING CHANGE

A high proportion of our work involves historic settings and heritage assets. These include Listed buildings and scheduled landscapes, development in Conservation Areas and sites with visual sensitivity requiring a Landscape and Visual Impact Assessment. We have been involved in some of the country's most important historic sites, including Windsor Castle and Hampton Court Palace.

Key services include:

- landscape and urban masterplans
- conservation management plans
- landscape and visual impact assessments
- landscape heritage assessments
- planning and development proposals
- planning enquiries and appeals
- landscape and urban design from concepts to completion
- ecology and arboricultural advice
- grant funding and lottery applications.

Our team brings a high level of expertise in identifying potential grant funding for heritage projects and we have maintained a success rate of over 90% Round 1 submissions to the Heritage Lottery Fund and 100% success at Round 2.

A growing portfolio of international projects include cultural asset management for sensitive sites, including tourism and visitor infrastructure, interpretation, and access improvements.

A public realm improvement project and new library building in close proximity to a Grade 1 Listed building required sensitive evaluation and design proposals. The project was led by Plincke and secured full planning support.

OUR TEAM

Every project is led at a senior level with support from graphics and technical assistants. Each key sector is headed by a sector director, who nurtures our expertise to ensure that the very best advice is available to our clients.

Our Historic and Cultural Asset Sector Leader is Colin Burden, Managing Director.

Colin has over 30-years industry experience gained in the UK, North American and Central Asia. He has been advisor to three UK government task forces and is a member of the University of Cambridge's Heritage Research Group.
